Week 7 - Well done and thank you for staying home and looking after each other!

Attachment:
- Is a basic human need
- Provides a sense of predictability, safety, security and protection
- Serves as the foundation for care, comfort, stimulation and interaction
- During this stressful time it is important that we feel attached to our children and they feel attached to us.

Activities to help to help promote attachment

Paint each other's faces with paint, powder, make up or just pretend.

Play a memory game with a personal touch. First have your child look you over very carefully. Then leave the room and return after you've made a change to yourself. See if he/she can figure out what is different.

Engage in an 'M&M' hockey match. Use bendy straws and blow M&Ms across the table to the other person's goal. When one of you scores a goal, the opponent feeds that person an M&M.

Play catch! Roll a ball back and forth to teach reciprocity. Throwing or batting a balloon back and forth may be easier than throwing a ball for little ones

Lotion Massage - Using lotion to massage a child's hands or feet can enhance attachment and strengthen a parent-child relationship. The massage can relax a person's physical body by reducing tension and bringing the brain into a less defensive state.

Brushing Hair - This can be a calming activity that includes a sense of nurturing which connects to a person's internal experience of attachment and bonding.
Seriously. STOP. And breathe.
If you’re feeling adrift, there’s a reason.
Humans have basic requirements (the bottom of the pyramid opposite) like food, water, air, shelter, sleep, etc. The biological basics. If those are met, then the next rung of the ladder is ‘safety and security’. If we feel safe and secure, then we can climb up and start on our ‘love and belonging’ needs and on up the ladder we go until finally at the very tippy-top is SELF-ACTUALISATION which would entail all of the cool aforementioned activities.
The catch is, you cannot level up until the needs at the current level are fulfilled. If the needs remain unfulfilled, we remain stuck on our current level until the situation changes. This is Maslow’s Hierarchy of Needs.

In the midst of a pandemic, we are dwelling in the basement of Maslow’s pyramid. How do you think you’re going to thrive at the highest levels when we can’t even find toilet paper.
YOU PHYSIOLOGICALLY AND PSYCHOLOGICALLY AREN’T BUILT TO LIVE YOUR “BEST LIFE” RIGHT NOW. YOUR JOB IS TO LIVE “A LIFE” RIGHT NOW.

But listen.
Are you eating, drinking water, and sleeping at all these days? If so, that is a triumph right now. Focus on the bottom level. Are you showering? Eating a vegetable once in a while? Getting some sunshine and fresh air? Keeping some resemblance of a sleep schedule?

Start there. And be extra gentle and abundantly gracious with yourself. We’ll get through this. And right now, getting through is absolutely enough.

If you change the way you look at things, the things you look at change.
—Le Vince D’er

Always Look for a Positive
As daft as it may sound there is always a positive for every negative.
If someone told you that you could be spending every minute of every day with the same people for at least four weeks what would you think? Would you be thrilled or filled with dread?
Well the reality is exactly that! That’s what most of us have done...so far!!
Think of the things that you have seen during that time that might have been missed if life was trudging along as normal.
How many forgotten thoughts and wishes have you rediscovered? Old hobbies, old loves or jobs that you simply had run out of time for?
How many family walks have you been on that would normally have been a family bundled into the car?
Who has seen the trees? The flowers? The clouds?
Things that are always there but mostly go unnoticed.
Who has taken the time to really appreciate what and who they have in their lives?

Appreciate these days...as scary and as uncertain as they are.
We will never get these days back so make sure to notice them.
Notice your children, your friends, your partner and enjoy the time you’ve got together.

CONGRATULATIONS!

THIS IS TO CERTIFY THAT

STAYED AT HOME, PROTECTED THE NHS & SAVED LIVES

Happiness is not about getting all you want, it is about enjoying all you have.

Our children are little heros, too.

Missing their grandparents, extended family, friends and school.
Lack of normal routines. Loss of structure to their day.
Parents who are stressed, worried, scared and just different.
Overhearing talk and news without an understanding of what they hear.

Give your little hero more cuddles, more one-on-one playtime, and an extra dose of patience and forgiveness.

unicorn puns
Read something silly.

Dress up. Or down. Or undress. Whatever makes you feel good.

Cuddle a stuffed animal. (No, you aren’t too old.)

Remember that you are lovable. Say it out loud.

Tell your diary all about it.

Admire something lovely.

Eat that one thing that sounds better than all the other things. Eat it s-l-o-w-l-y.
